NDPhA Journal • Vol. 29, No.3 • September 2016

A Voice for Pharmacy Since 1885
NoDak Pharmacy Journal
Submission Policy
The ND Pharmacists Association is pleased to accept submissions for the Journal. Submissions should be reasonable in length due to space considerations. In order to ensure the quality of our publication, editing for grammar, spelling, punctuation and content may occur. Articles, photos, and advertising should be submitted in electronic form.

To submit, please email NDPhA at: lgiddings@nodakpharmacy.net

The deadline for the Next Issue is: Nov. 9th, 2016
September 2016:

Colleagues,

As the season begins to change, we also begin a transformation to busy children in school, warmer clothing, reorganization of space, consideration of different priorities, and trying to plan for the next six months so that life seems a little bit more in control!

As you work through these seasonal changes, I would encourage you to consider potential changes for your fellow pharmacists and your career. In January, the ND legislative sessions will begin. NDPhA is working closely with the pharmacists across the state to consider areas of concern and need within your practices that could be affected by a “pro pharmacy” legislative session. We need your involvement, help, and support in voicing your opinions!

NDPhA leadership and the NDPhA Governmental Affairs Committee are working to address the multiple issues that exist in the PBM market. If you would like to express some of your issues, please contact the NDPhA office or other members of the Governmental Affairs Committee.

We are also working to advance the practice of pharmacy through the support and promotion of provider status and the “About The Patient” program.

The North Dakota State University School of Pharmacy is working with NDPhA to bring a Point of Care testing certificate to pharmacists in the form of continuing education. Stay tuned to learn more about this exciting opportunity that will prepare pharmacists to screen patients for influenza, streptococcus, hepatitis C and HIV. Announcements on upcoming programs should be coming out later this fall.

In my July newsletter, I asked YOU to become more active in your Association. We need YOU!!! Please do not sit back and let this season of considerable change control you and your practice.

Wanda Roden

President NDPhA
Better Together with Health Mart.

Whether you are just starting out or looking to expand, Health Mart® is a franchise designed for today’s independent pharmacy owner. Health Mart includes a comprehensive portfolio of marketing, clinical and business solutions to help you care for the health of your patients and your business.

Our member pharmacies are locally owned and focused on great service, but they’re also gaining a competitive edge and national recognition in ways that community pharmacies never have before. That’s what happens when thousands of independently owned pharmacies come together.

That’s better together.

---

Team up with Health Mart to drive success today.

Greetings Fellow Technicians,

Welcome to our newest NAPT board members; Arlene Monson and Twana Dick. We are excited to have them serve on the NAPT board and look forward to working with them to better our organization.

I would like to invite all Pharmacy Technicians to the Fall Conference to be held in Fargo on October 7-8 at the Holiday Inn. Registration forms were mailed to all technicians and can also be found on the NDPhA website. This year we are going “green”; the speaker handouts will be posted on the NDPhA website for easy access, or the option to print if you prefer.

The Fall Conference committee has an exciting conference planned with Miriam Mobley Smith from PTCB as this year’s keynote speaker. Her presentation is “Advancing the Roles for Pharmacy Technicians in an Evolving Health Care Environment: Failure is Not an Option!” There is an exceptional lineup of speakers who will provide great continuing education for our profession. We are trying something new this year. We will be using “Poll Everywhere,” so be sure to bring your cell phones. This will give you the opportunity to share and answer questions anonymously.

The NAPT Executive Board and Fall Conference Committee are excited to be debuting the Pharmacy Technician recruitment video at the Fall Conference. Register soon…you don’t want to miss it!

Congratulations to NAPT for receiving “The AAPT Chapter of The Year Award”. This award is presented annually for the Chapter whose achievements have enhanced the profession of Pharmacy Technicians. Congratulations North Dakota Pharmacy Technicians!!

Celebrate Pharmacy Technician Day on October 18th!

Thank you for all you do for your patients and your pharmacy!

AAPT Convention Update

President-Amanda Olauson, CPhT

The 2016 AAPT Convention was held in Omaha, Nebraska, at the University of Nebraska Medical Center College of Pharmacy on July 7 & 8.

A total of 12 CE was provided to the registered attendees including 1 Law specific and 1 Patient Safety.

I was honored to be the North Dakota, NAPT representative at the House of Representatives meeting. AAPT President Judy Neville lead the meeting. On the agenda we reviewed 2014-2015 Officer Reports, a status overview of current accounts, Chapter updates (North Dakota, North Carolina, Washington, Texas and New York), President’s goals and action items.

1. Review of Officer Reports in a quick summary:

President Judy Neville, mentioned what she had done in the past year and what she plans to do. Some main items were promotion of AAPT and membership recruitment. New leadership roles were appointed, Fred Shackleford was acknowledged as an Original Founder and appointed as an Advisor; Emma Wickland was appointed as a Membership Ambassador; Kristy Malacos was appointed as an Executive Advisor; and Tony Beraldi was appointed as Pharmacist View. She also listed some changes with the AAPT Website that they are working on, mostly cost. She solicited 2 CE for the year, one from Flavor Rx and the other regarding Professionalism. Lastly, she came up with the idea for a journaling initiative and appointed Emma Wickland as the forerunner. It was named “Our Voice” and will be featured in Pharmacy Times Magazine.

Emma Wickland, Membership Ambassador mentioned the success of the “Our Voice” journaling project and the upkeep of the AAPT Facebook page.

Alice Foust, Office Support, submitted updates on her upkeep of the office, answering the phone, etc. Also mentioned that the physical office has been closed. She will still perform her routine duties, just without the office.

2. Overview of Accounts:

Current membership includes approx. 400 members for 2016.

Treasury reports were listed on screen and not printed for review.

3. Each Chapter that was present gave an update, Northland, Alamo and NCAPT.

4. President’s goals for 2016-17 focused mainly on membership and advertising of AAPT.

5. Pharmacy Technician day will be October 18. No theme is currently set.

6. New officers were installed and Judy announced that there were two write-ins for Vice-President: Mr. Ryan Lee and Ms. Donna Kisse. Both were told to think about it and discuss the position with Judy at a later time.

Convention updates:

As I mentioned before, there were 12 speakers (12 CE). The keynote speaker’s topic was “Positive Effects of Teamwork”.

Two awards were given out. The first was the Founders Award, given to someone who is a great advocate for technicians and AAPT, one who encourages membership and Convention attendance. The Board of Founders Committee voted and Mr. Malphus Stroud won the award.

The second award is the Chapter of the Year Award, awarded to the chapter for their accomplishments made in the previous year (2015). This year I am thrilled to announce that our very own Northland Chapter received this award. As President, and HOR Representative for North Dakota I personally accepted the award and it was a great honor! Pictures were taken with Fred and Judy and later included all North Dakota representation, Donna Kisse, Diane Halvorson and Candy Aamold.

I want to thank NAPT for giving me this wonderful experience! It was a great learning curve for me. North Dakota has wonderful, educated Technicians and I am proud to be working among them all!

Thank you much!

Amanda Olauson
President, NAPT

Left to Right: Donna Kisse, Amanda Olauson, Judy Neville, Candy Aamold, Diane Halvorson
# NAPT Fall Conference Schedule

**2016 Annual Fall Conference**  
October 7 & 8, 2016 • Holiday Inn, Fargo, ND

**Friday, October 7, 2016**

| 5:50 - 6:50 | Dr. Mark Hardy, PharmD, Executive Director of the ND State Board of Pharmacy:  
**North Dakota State Board of Pharmacy Updates**  
0047-9999-16-018-L03-T (Activity Type - Knowledge) 0.1 CEU  
1. Describe changes made to Law and Rules and how they may affect Pharmacy Technicians.  
2. Discuss the potential impact of Pharmacy Technician’s screening patients.  
3. Identify and clarify any issues related to the practice of pharmacy. |
| 6:50 - 7:50 | Gene Anderson, Retired Senior Patrol Lieutenant of Fargo Police Department:  
**Security in the workplace - keeping yourself and patients safe.**  
0047-9999-16-024-L05-T (Activity Type - Knowledge) 0.1 CEU  
1. Describe techniques for keeping patients and employees safe utilizing situational awareness.  
2. Identify the steps in conducting a workplace threat assessment.  
3. Discuss strategies for maintaining a safe work environment for patients and employees. |
| 7:50 - 8:05 | Break - Snack provided                                               |
| 8:05 - 9:05 | Virginia Demmer, RN:  
**Empathy for all aspects of Life**  
0047-9999-16-021-L04-T (Activity Type - Knowledge) 0.1 CEU  
1. Define the meaning of empathy and sympathy to include its effect on patient care.  
2. Analyze empathy in our role in the health care setting.  
3. Describe the impact of empathy on success in the workplace and patient care. |

North Dakota State University College of Health Professions, School of Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. Attendance at the session and completion of the evaluation form will be required to receive CE credit. Pharmacy professionals can now obtain CE statements of credit on the CPE Monitor website. Non-pharmacists will receive a noncredit transcript within 4-6 weeks of receipt of all evaluation materials.

Target Audience:  
Pharmacy Technician, Pharmacy Technician in training and Pharmacy Technician Student
Saturday, October 8, 2016

7:30  Registration table opens (Buffet breakfast served)

7:50 - 8:00  Welcome

8:00 - 9:00  Keynote Speaker, Miriam A. Molbey Smith, PharmD, FASHP,
Director of Strategic Alliances Pharmacy Technician Certification Board:
Advancing the Roles of Pharmacy Technicians in an Evolving Health Care Environment: Failure is Not an Option!
0047-9999-16-017-L04-T (Activity Type - Knowledge) 0.1 CEU
1. Describe the national landscape and expanded roles for pharmacy technicians.
2. Describe the regulatory issues and related barriers that have emerged as a result of the expansion of pharmacy technician roles and responsibilities.
3. Identify the differences in pharmacy technicians education and licensing requirements across state regulatory boards.

9:00 - 9:15  Break

9:15 - 10:15  Judy Neville, CPhT, Director of Pharmacy Technician Education, UNMC College of Pharmacy and Drug Discovery
“Our Voice” Pharmacy Technicians Speak Out on National Trends Regarding their Role in Patient Care.
0047-9999-16-019-L04-T (Activity Type - Knowledge) 0.1 CEU
1. List advanced practice roles that pharmacy technicians have available to them.
2. Give examples of regulation that affects the pharmacy technician’s workflow.
3. Summarize education and training mandates for pharmacy technicians on a national level.

10:15 - 11:15  Diane Halvorson RPhTech, CPhT:
Identifying the Pharmacy Technicians Role in the Epidemic of Drug Diversion in the Workplace
0047-9999-16-022-L05-T (Activity Type - Knowledge) 0.1 CEU
1. Describe drug diversion in the workplace.
2. Identify the processes and resources a pharmacy technician can use to report potential drug diversion.
3. Discuss drug diversion in the professional setting and its impact on the work environment.

11:15 - 12:15  Mark Coppin, M.S., B.S., B.A., Director of Assistive Technology, Anne Carlson School:
Accessing Abilities
0047-9999-16-023-L04-T (Activity Type - Knowledge) 0.1 CEU
1. Identify essential components of Universal Design for Learning.
2. Describe the difference between Universal Design and Universal Design for Learning.
3. Identify accessibility features built into mobile devices.
4. Identify accessibility features built into computers.

12:15 - 1:30  Working Lunch/NAPT General Business Meeting

1:30 - 2:30  Judy Neville, CPhT, Director of Pharmacy Technician Education, UNMC College of Pharmacy and Drug Discovery:
The Pharmacy Technician’s Role in Pharmacy Audit
0047-9999-16-020-L03-T (Activity Type - Knowledge) 0.1 CEU
1. Describe the process for pharmacy audit selection and review.
2. Define Fraud, Waste, and Abuse and know how to report suspicion.
3. List common examples of 3rd party payer non-compliance that occur within the pharmacy and steps to mitigate.

2:30 - 2:45  Movie Premiere

2:45 - 4:45  Lawrence Patnaude, PharmD, Director of Experiential Outreach and Assessment, NDSU School of Pharmacy:
Pharmacology for Pharmacy Technicians – Your Role in Patient Safety
0047-9999-16-025-L05-T (Activity Type - application) 0.2 CEU
1. Describe the pharmacy technician’s role in identifying medication issues related to patient safety.
2. Identify common medication dosages and indications, drug interactions, and common side effects.
3. Analyze prescription information to identify potential medication related issues.

Room rates are available for
Friday, October 7 and/or Saturday, October 8, 2016.
Room Reservation must be made by:
October 1, 2016

Video Premiere Release
The NAPT Executive Board along with the Video Committee are excited to announce the release of the NAPT Pharmacy Technician recruitment video. The video will be released at the NAPT Annual Fall Conference on October 7th & 8th at the Holiday Inn in Fargo, ND. Register soon...You don't want to miss it!

GOING GREEN!
In an effort to minimize paper waste, we will “go green” for Fall Conference 2016. All speaker handouts will be available on the NDPhA Website for each attendee to print as desired prior to the meeting.

Directions on how to access this information will be provided upon receipt of your registration.
Medical Association Update

Across the nation, prescription drug abuse is continuing to expand into an epidemic and the complications involved are being reported at an alarming rate. I know your profession, along with mine, has been called upon to address concern with abuse and misuse of drugs. Along with this comes regulatory efforts to address these complications, I want to highlight a couple of the efforts which have been rolled out to our pharmacies to hopefully help the public. Maybe these efforts will assist you in your practice!

Drug Disposal program opportunity for North Dakota Licensed Pharmacies

The North Dakota Board of Pharmacy has developed a partnership with the Yellow Jug Old Drugs Program to provide an option for the safe disposal of a patient’s prescription drug medications. The Board has generously decided to provide these systems and containers to any pharmacy eligible and willing to participate in the program. This will be free of charge and depending upon the impact and scope of the program, the Board hopes to continue funding for future years.

The collection of unused controlled substances from the public is a new initiative based on a rule recently passed by the Drug Enforcement Administration [DEA], which allows certain DEA registrants, such as pharmacies, to be eligible to register as a disposal location and provide that service to the public in your area. North Dakota now has over 50 pharmacies participating in the program and has made those sites available to the public in conjunction with the Attorney General’s take back program at http://www.ag.nd.gov/PDrugs/TakeBackProgram.htm

Information on the procedures for registering with the DEA as a disposal site was sent to pharmacies, along with instructions on how and where you would need to place the secure container within the pharmacy so it is accessible to the public. If pharmacies need this information, they can contact the Board office.

The goal of providing this program to our citizens in an accessible manner is to decrease the number of prescription drug medications left in medicine cabinets, waiting to be discovered by an individual who will divert it for misuse. National data shows 71% of people misusing prescriptions first obtain them from friends or relatives. This is why it is important for pharmacies to provide this service and to inform your patients of this program.

Pharmacies received forms to complete in order to participate in the program. Once a form is submitted to the Yellow Jug Old Drugs Program, the pharmacy will receive a container as soon as one is available. Of course, participation is voluntary and a service a pharmacy can choose to offer. We hope pharmacies will agree to provide this important service by becoming a disposal location for their patients and the public.

Limited prescriptive privileges for Naloxone by Pharmacists

The Board of Pharmacy finalized rules (NDAC 61-04-12) implementing the authority given by Senate Bill 2104, which granted prescriptive privileges for Naloxone to pharmacists in North Dakota. This important measure will be one of the tools the profession of pharmacy can utilize to help save lives from the illicit and prescription drug abuse issues currently affecting so many.

The process for a pharmacist to prescribe Naloxone is available on the Board’s website along with information which can be provided to at-risk patients and patient’s loved ones. The process is very straightforward and involves reviewing the context of the rule, completing one of the educational programs, and informing the Board of their intentions to prescribe this life-saving drug. The Board will make the locations to which pharmacists are prescribing Naloxone available to the public for their information.

Included in the rule is the requirement for the pharmacist to communicate to the primary care practitioner the fact that a prescription for Naloxone was prescribed to their patient.

Reducing Pharmaceutical Narcotics in our communities stakeholders committee

These two initiatives along with others stemmed from discussions from this committee which is made up of stakeholders representing legislators, practitioners, pharmacists, treatment professionals, law enforcement, and many other groups. This group regularly meets to discuss the epidemic of the misuse of controlled substances and how we can collectively work together on initiatives to help address the issues across the state of North Dakota.

As always, the Board of Pharmacy is interested in hearing from you on solutions to help tackle the abuse trends we are seeing across the state of North Dakota. Feel free to reach out at any time to our office.

Dr. Mark Hardy,
Board of Pharmacy
Minimizing the Risk of Opioid Overdose through Clinical Practices

Pamela Sagness, Behavioral Health Division Director

Overdose deaths in North Dakota increased from 20 deaths in 2013 to 43 deaths in 2014 (CDC/NCHS, National Vital Statistics System, Mortality). You can prevent opioid overdose through the care you take when prescribing opioid analgesics, monitoring your patient’s response, and effectively identifying and addressing opioid overdose.

The risk of opioid overdose can be minimized through adherence to the following clinical practices, which are supported by a considerable body of evidence:

**Assess the patient:** Obtain history of the patient’s past use of drugs (illicit and prescribed medications with misuse potential) by asking specific questions that may indicate behaviors of misuse. For example, “Have you taken a medication to give you more energy or to cut down on your appetite?” and “Have you been taking anything to help you sleep (including medications or alcohol)?”

**Take precautions with new patients:** Determine who has previously cared for the patient, what medications have been prescribed and for what indications, and obtain medical records (with patient’s consent.) In an emergency, prescribe the smallest possible quantity, typically not exceeding a three-day supply, and arrange for a return visit the following day.

**Utilize the North Dakota Prescription Drug Monitoring Program (PDMP):** Designed to monitor the prescribing and dispensing of controlled prescription drugs to patients, the PDMP can give you critical information regarding the patient’s controlled substance prescription history before selecting a medication for the patient. For more information on North Dakota’s PDMP, visit: [https://www.nodakpharmacy.com/pdmp-index.asp](https://www.nodakpharmacy.com/pdmp-index.asp).

**Select an appropriate medication:** Rational drug therapy demands that the efficacy and safety of all potentially useful medications be reviewed for their relevance to the patient’s disease or disorder. When an appropriate medication has been selected, the dose, schedule, and formulation should be determined. These choices often are just as important in optimizing pharmacotherapy as the choice of medication itself. Even when sound medical indications have been established, physicians typically consider three additional factors before deciding to prescribe an opioid analgesic: (1) the severity of symptoms; (2) the patient’s reliability in taking medications; and (3) the dependence-producing potential of the medication.

**Educate the patient:** Inform the patient about risks and benefits of the proposed therapy and ethical and legal obligations such therapy imposes on both you and the patient. Patient education should specifically address the potential for physical dependence and cognitive impairment as side effects of opioid analgesics.

**Execute the prescription order:** Careful execution of the prescription order can prevent manipulation by the patient or others intent on obtaining opioids for non-medical purposes.

**Monitor patient response to treatment:** Proper prescription practices do not end when the patient receives a prescription. Recognizing the potential for non-adherence, especially during prolonged treatment, is a significant issue.
step in overdose prevention. If you become concerned about the behavior or clinical progress (or lack thereof) of a patient being treated with an opioid analgesic, it is advisable to seek consultation with an expert in the disorder for which the patient is being treated and an addiction expert.

Prescribe naloxone along with the patient’s initial opioid prescription: Prescribing naloxone is a vital link in preventing overdose deaths from opioid pain medications and heroin. Naloxone competitively binds opioid receptors and is the antidote to acute opioid toxicity. With proper education, patients on long-term opioid therapy and others at risk may benefit from a naloxone prescription.

Legal and Liability Considerations
Prescribing naloxone is consistent with the drug’s FDA-approved indication, resulting in no increased liability so long as the prescriber adheres to general rules of professional conduct. You are protected under North Dakota law. North Dakota offers immunity from civil and criminal liability to individuals who prescribe, distribute, dispense, receive, possess, or administer an opioid antagonist under North Dakota Century Code 23-01-42.

Consider prescribing intranasal spray (Narcan®) or auto-injector (Evzio®) naloxone to patients who are:
- Taking high doses of opioids for long-term pain management
- Receiving rotating opioid medication regimens (at risk for incomplete cross-tolerance)
- Using opioids for legitimate medical need, coupled with a suspected or confirmed history of substance use disorder or non-medical use of prescription or illicit opioids
- Using a combination of opioids plus a benzodiazepine or other sedative
- Combining opioids with alcohol, OTC, or other central nervous system depressant
- Recently released from incarceration or an abstinence-based program (and presumptively with a reduced opioid tolerance and high risk of relapse)
- On certain opioid preparations that may increase risk for opioid overdose such as extended release/long-acting preparations

Most private health insurance plans, Medicare, and Medicaid cover naloxone for the treatment of opioid overdose.

Decide whether and when to end opioid therapy: If out-of-control behaviors indicate that continued prescribing is unsafe or causing harm to the patient, immediate cessation of prescribing is advised. These may include altering or selling prescriptions, accidental or intentional overdose, multiple episodes of running out early, doctor shopping, or engaging in threatening behavior. When such events arise, it is important to separate the patient as a person from the behaviors caused by the disease of addiction, as by demonstrating a positive regard for the person but no tolerance for the aberrant behaviors.

Willborn first student to graduate from pharmacy and public health dual degree program at NDSU

By Carol Renner, Office of the Dean, Communication Specialist
NDSU College of Health Professions

Robert Willborn likes to examine health care needs from many different angles. It’s just one of the reasons he combined pharmacy with public health while pursuing his education at NDSU. During the School of Pharmacy’s PharmD. Hooding Ceremony in May, he became the first student to graduate from NDSU with both a doctor of pharmacy degree and a master’s degree in public health.

Willborn found the dual degree program to be the right fit for his future career goals.

“I was able to improve my interprofessional communication skills due to the multidisciplinary environment inherent within public health,” he said. “I was also able to get a better perspective on how practicing pharmacists can contribute to the goals of public health in the United States.”

Originally from Cambridge, Wisconsin, Willborn completed his undergraduate degree in pharmaceutical sciences at NDSU. In the five years needed to pursue his doctor of pharmacy degree and his master’s degree in public health, he also took advantage of opportunities such as a graduate assistantship in pharmacy practice, presentations at regional and national public health and pharmacy conferences, and publication of research in which he participated.

Willborn had a commentary titled “Pharmacy’s Influence and Opportunities in Public Health” published for the student contributions section of the American Journal of Health-System Pharmacy. His research regarding diabetes and depression also was published.

As part of his professional training, Willborn completed pharmacy rotations in West Fargo, Valley City, and Fargo, North Dakota, as well as in Sauk Center and Robbinsdale, Minnesota, Silver Springs, Maryland, and Rice Lake, Wisconsin.

He begins his residency with Denver VA Medical Center. Willborn also has his sights set on future professional opportunities.

“I am setting myself up to pursue a career as a clinical pharmacist providing patient care services within a larger healthcare system or teaching hospital,” said Willborn. “However, I would like to find a vocation in which I can utilize both my education in pharmacy and public health, which could include options such as the U.S. Public Health Service.”
“I’M ALWAYS WATCHING OUT FOR MY PATIENTS, BUT WHO’S WATCHING OUT FOR ME?”

WE ARE.
We are the Alliance for Patient Medication Safety (APMS), a federally listed Patient Safety Organization.

Our Pharmacy Quality Commitment (PQC) program:
• Helps you implement and maintain a continuous quality improvement program
• Offers federal protection for your patient safety data and your quality improvement work
• Assists with quality assurance requirements found in network contracts, Medicare Part D, and state regulations
• Provides tools, training and support to keep your pharmacy running efficiently and your patients safe

PQC IS BROUGHT TO YOU BY YOUR STATE PHARMACY ASSOCIATION
Whether treating infections or fighting cancer— NDSU students contribute to health research

By Carol Renner, Office of the Dean, Communication Specialist, NDSU College of Health Professions

From research to create new medications to developing proteins that could fight skin infections, undergraduate and graduate students in the School of Pharmacy at NDSU have opportunities for hands-on learning in the labs of Sudro Hall. Others take advantage of opportunities outside the lab.

Students Kayla Heier, Arianna Vidger and Emily Olig spent their summer working in research labs, while Jenna Gullickson was immersed in breast cancer research, presenting findings at a national conference.

Seeking new ways to treat skin infections

The lab of Dr. Stefan Vetter in pharmaceutical sciences presented a unique opportunity for first year pharmacy student Kayla Heier.

“I have always been interested in the research side of pharmacy, and I wanted to get some hands-on experience with it before making any more choices about my schooling and classes,” said the Perham, Minnesota native.

“My area of focus is on a small protein that is part of the human body’s innate immune system. It is released by white blood cells as part of inflammation, and binds metals to help keep them away from invading organisms,” explained Heier.

Dr. Vetter developed a variant of a human protein with antimicrobial properties that could lead to novel treatments for skin infections and expand the range of topical antimicrobials available. The discovery led to an opportunity for Heier.

“We have been working on making this protein ourselves by growing it in bacterial cells, and the majority of my work has been focused on testing if our manufactured protein behaves in the same way as the natural protein in the human body,” said Heier. “Part of my study is to see if this protein will work as an effective topical antibiotic.”

While the summer research experience was her first time working in a lab, Heier said it was a positive one. “This experience has definitely helped me see that I enjoy lab work, and that I may want to continue working in a lab in the future.”

Heier plans to work in the field of pharmacy in a hospital or emergency room.

Taking aim at pancreatic cancer

Until working in the lab of Dr. Estelle Leclerc in pharmaceutical sciences, second year pharmacy student Arianna Vidger had very little exposure to the research process.

Dr. Leclerc’s lab is part of a research group working on pancreatic cancer. Vidger, from Fargo, conducted experiments to examine the role of a particular receptor on the growth of cancer cells.

“This receptor is present in higher than normal levels in many diseases, including pancreatic cancer,” said Vidger. “This kind of research will help scientists better understand how certain characteristics and structures of cancer cells contribute to the development of tumors. These structures may conceivably become targets of drugs and other therapies,” explained Vidger.

The long and often complex time frames needed to advance research surprised Vidger during her summer research experience.

“There are starts and stops, problems to be solved, mistakes that must be corrected, and time-consuming processes that may or may not give the expected results,” said Vidger. “I am thankful for deeper, more practical understanding of the research process that this experience has given me,” she said. “I have learned a lot about the practical aspects of lab work, as well as experiment planning and analyzing results.”
Vidger will apply what she learned in her summer research experience on her future career path. She hopes to eventually work as a hospital pharmacist.

**Treating chronic bone infections**

In the lab of Dr. Amanda Brooks, second-year medical student Emily Olig found opportunity.

“As a medical student, it is really beneficial for our applications to residency when we have research experience and publications. It shows many teaching hospitals that we value research and understand how to pursue it,” said Olig.

Research in the Brooks lab includes chronic osteomyelitis in military veterans who have experienced significant bone trauma. Researchers are using 3-D encapsulated cells to model a bone infection, and then deliver nanoparticle antibiotics directly to the cells in the model.

Olig studied the interactions between bacteria and bone cells. The Fargo native investigated how the interactions might be manipulated to prevent chronic bone infections that are extremely difficult to treat.

“There is an increasing occurrence of these types of chronic infections in orthopedic surgery and in amputees, such as in our veteran population. Preventing these infections from settling would improve long-term outcomes of many different orthopedic surgeries and improve quality of life for many people,” she said.

Working in the lab of Dr. Brooks also provided Olig an opportunity to learn how to approach research questions, and assess available information to ultimately decide what needs to be studied.

“After my experience at NDSU, I am driven to hone my researcher’s point of view and pursue clinical research during my residency and beyond, in order to further benefit my patients,” Olig said.

**Presenting breast cancer research to a national audience**

Third year pharmacy student Jenna Gullickson took a different approach in her summer research experience. She presented research at the Ronald E. McNair Scholars Symposium at the University of California Berkeley during summer break.

Gullickson reviewed research that investigates a protein known as programmed cell death 1 (PD-1). Certain types of medications inhibit or block PD-1 and are used in treating some types of cancer. She investigated the future role of PD-1 inhibition in triple-negative breast cancer.

A native of Center, North Dakota, Gullickson worked with Dr. Lisa Narveson in pharmacy practice in the College of Health Professions.

“I learned that research is truly an effort of many, whether carried out in the lab or in an office,” said Gullickson, who also worked with Anna Sheppard, TRIO McNair Scholars Program director and Merete Christianson, health sciences librarian at NDSU.

“This experience allowed me to improve my research skills as a student pharmacist, network with students from a variety of disciplines throughout the United States, and become more knowledgeable in the study of oncology, an area that I am passionate about!” said Gullickson, who ultimately hopes to become a professor of pharmacy practice.

Opportunities in research conducted in the College of Health Professions provide students another way to augment their studies. Competitive research grants awarded to the College of Health Professions have grown from $500,000 to nearly $30 million today, including research involving colon and pancreatic cancers, drug delivery systems, effects of tobacco and related products, Alzheimer’s disease and other health topics.
Pharmacy and education play crucial roles in healthcare workforce development

By Carol Renner, Office of the Dean, Communication Specialist
NDSU College of Health Professions

As a primarily rural state, North Dakota faces unique challenges to serve the healthcare needs of its citizens. One report shows that 81 percent of the state’s 53 counties are designated as health professional shortage areas. Another study from the Georgetown University Center on Education and the Workforce shows that North Dakota will have 4,430 registered nurse openings through 2020.

The growing need for healthcare professionals in North Dakota impacts its citizens and hundreds of health care facilities. These inter-related challenges necessitate collaborative efforts of many groups, including pharmacists, education, healthcare providers and government to develop both short-term and long-term strategies to meet this challenge.

NDSU’s School of Pharmacy in the College of Health Professions responds to the region’s critical healthcare workforce needs by:

- Providing graduates in pharmacy, nursing, allied sciences and public health to serve the state
- Discussing expansion of pharmacists’ roles as providers to address the critical shortage of health care providers
- Improving access to healthcare and to health professionals in rural communities through telehealth
- Identifying the ability to expand the number of students we graduate from the School of Nursing and the School of Pharmacy, although program increases are constrained by accreditation concerns that cite lack of sufficient space
- Forging an educational model where students in pharmacy, nursing, dietetics and social work collaborate as an interprofessional team to ultimately improve the quality of healthcare
- Training healthcare professionals who stay in North Dakota, with approximately 80 percent of NDSU nursing graduates annually staying in the state and 90 percent of the pharmacists being NDSU graduates

The College of Health Professions is examining ways to help meet both short- and long-term needs for health professionals in the state. Enhancing program enrollments and expanding facilities to address critical workforce shortages of health professionals would provide an avenue to:

- Enhance teaching, research and clinical lab training for students
- Upgrade technology to enhance the quality of education
- Eliminate the need for separate leased space for nursing, public health and health library areas, now located off campus, and
- Address accreditation concerns about lack of sufficient space that impede improvements needed for continued accreditation

Over the long term, establishing space for interprofessional education where students work in collaborative teams, just as they will in hospitals, clinics, and other health care settings upon graduation, could help serve the growing need for additional health care professionals.

Enhanced space for simulation training would integrate concept pharmacy, nursing simulation, assessment and skills laboratories into one highly efficient training facility, rather than the current segregated training locations.

Students in the College of Health Professions receive the most up-to-date training possible to serve patients, but limited physical space and other factors constrain the number of students who can be admitted to the programs. The College of Health Professions at NDSU includes the School of Pharmacy, School of Nursing, Department of Allied Sciences, the Department of Public Health, Family HealthCare Pharmacy and the North Dakota Telepharmacy Project.

In collaboration with healthcare providers and additional groups, the NDSU College of Health Professions provides a critical link to supply a steady stream of health professionals serving North Dakota. The College is committed to the university’s land-grant mission to develop solutions for challenges affecting the state and its citizens.

Alumni Day held in NDSU School of Pharmacy

By Carol Renner, communications specialist, Dean's Office, NDSU College of Health Professions

More than 110 alumni and friends from pharmacy, nursing, allied sciences and public health attended Alumni Day in the College of Health Professions at NDSU on August 27. An Open House at Sudro Hall provided pharmacy alumni the opportunity to visit with current students and tour the building to learn more about current programs and research.

Those attending also enjoyed a Bison Football Tailgating and Watch Party at the Fargo Air Museum with an exciting overtime game victory. It was just part of the weekend festivities, which included a visit by an ESPN crew filming in the College of Health Professions to see academics in action at NDSU. Pharmaceutical sciences research and video in the lab of Dr. Amanda Brooks was aired and mentioned by color commentators during the third quarter of the game, netting visibility for School of Pharmacy programs. Thank you to alumni for their support of programs and students in the School of Pharmacy at NDSU.
Cutting-edge editorial content
“NoDak Pharmacy Journal” offers clear, sophisticated, up-to-date, and comprehensive information that readers can apply immediately in their own firms and organizations.

In articles written by some of the most authoritative practitioners and instructors in the field, “NoDak Pharmacy Journal” covers a broad range of subjects.

Readers want a competitive advantage
“NoDak Pharmacy Journal” serves the membership and prospective members of the NDPhA, with a beautiful full color publication. “NoDak Pharmacy Journal” is published five times a year. The circulation is over 1,200 each issue.

Design Information
Ads may be submitted in .tiff, .eps, .jpg, or .pdf format. 300 DPI, high resolution press quality CMYK images only. Ads may be submitted as original Illustrator or Photoshop format. If the original ad is submitted, please include all linked files and change all type to outlines. Please provide hard copy print. Ads on a disk or e-mailed must be zipped (PC), or stuffed as a self-extracting file (MAC).

Original copy may also be submitted along with photos and art. Quality Printing will design or modify an ad for you. You will be charged $50 per hour for design work.
